Acceptable-Use Policy Acknowledgement

I acknowledge that I have completed the security induction and understand my responsibility to protect organisational, project, and personal information.

I agree to:

- Use organisation systems, accounts, devices, and networks only for authorised purposes
- Keep passwords confidential and use strong authentication practices.
- Protect sensitive and personal information in accordance with privacy and POPIA requirements.
- Report security incidents, suspicious activity, data breaches, or policy violations immediately.
- Avoid installing unauthorised software or accessing restricted resources without approval.
- Follow all security, confidentiality, and acceptable-use requirements during my placement.

COMSEC Briefing Summary

Communications Security (COMSEC) Rules for the Cohort

Purpose:

- COMSEC protects information from unauthorised access, disclosure, modification, or loss during communication and collaboration activities.

Key Rules

- Protect Credentials
- Never share passwords, PINs, MFA codes, or account credentials
- Use strong, unique passwords for all systems
- Handle Information Securely
- Only share information with authorised individuals
- Classify and handle sensitive data appropriately
- Avoid discussing confidential information in public spaces
- Use Approved Communication Channels
- Use approved project platforms, email accounts, and collaboration tools
- Do not transfer work files through unauthorised personal services
- Verify Before Sharing
- Confirm recipient identities before sending sensitive information
- Double-check email addresses and file permissions
- Recognise Social Engineering
- Be alert to phishing emails, suspicious links, fake login pages, and requests for credentials.
- Report suspicious communications immediately
- Secure Devices
- Lock devices when unattended
- Keep systems updated with the latest security patches
- Use antivirus and endpoint protection where required
- Protect Personal Information
- Follow POPIA principles when processing personal data
- Collect and store only necessary information
- Report Incidents Promptly
- Report data breaches, lost devices, malware infections, or suspicious activity as soon as possible
- Early reporting reduces organisational risk

Conclusion

- All cohort members share responsibility for maintaining a secure environment. Following COMSEC principles helps protect project information, organisational assets, and personal data while supporting compliance with security and privacy requirements
